

Eaton

12 Hour Autonomy Battery Packs

Eaton are a worldwide manufacturer of AC UPS systems . A leading provider of quality backup power UPS, Uninterruptible Power Supply, Eaton UPSs are designed to deliver high quality backup power from desktop PCs to large data centers. Eaton organise their backup power into three categories: Workstation & Home UPS, Network & Server UPS, and Data Center & Facility UPS.

Harland Simon UPS Ltd has been a Value Added Reseller for Eaton for 20 years and as an independent reseller, Harland Simon has a broad range of preferred suppliers and products to choose the best solution for the job.

Eaton has many end users, one of which is a large telecommunications operator, who require long runtime solutions for their telecom equipment. In this instance, Eaton needed a system from a UPS partner and so came to Harland Simon for their expertise and range of long runtime battery packs which are compatible with their UPS systems.

Harland Simon supplied a number of self-contained battery cubicles, which were delivered to site fully assembled and ready for connection to the AC UPS which can be sat on top of the battery pack to save on floor space. This particular order was for 5 x 234Ah battery packs.

The end client was able to have a self-contained battery enclosure which was fitted with 10 year design life batteries, also fitted with an internal battery charger to ensure the batteries are recharged in a fast time ready for repeat duty. In this case 12 hours.

Scott Billson, Commercial Sales Manager, said, "as an Eaton UPS Partner it is good to have developed a long runtime solution which works with and has been approved by Eaton for their single phase range of UPS systems".

"Eaton has worked closely with Harland Simon for a number of years to deliver bespoke power management solutions to its customers. We are pleased that Harland Simon was able to meet the challenge of delivering a battery enclosure on time and within specification for this client.", Antoinette de la Motta, Eaton Electrical Group.
