

NHS Barnsley Hospital

40 kVA AC UPS Systems

Barnsley Hospital is an NHS Foundation Trust based in South Yorkshire, England. As an associate teaching and research hospital affiliated to the University of Sheffield, it provides a range of acute hospital services to a population of around 220,000 and has 450 beds. Services include emergency, maternity, general and specialist surgery, critical care, medicine, elderly people's services and medical imaging.

During 2006/2007 Harland Simon UPS Ltd. worked as the primary consultant on a project and wrote the specification.

We were subsequently awarded the contract to supply, install, commission and maintain 2 x 40 kVA AC UPS systems with full project management given throughout the duration of the work.

"In addition to supplying the UPS systems Harland Simon was the main contractor and site work involved partitioning the room, air conditioning installation, diamond drilling and the various AC/DC installation works."
Andy Parfitt, Sales Director HSUPS.

- » Site installation services
- » Project management
- » Ongoing service and maintenance

In 2013 Barnsley Hospital placed orders for a 50 kVA isolation transformer, additional batteries to extend the current capacity and a UPS for the business continuity room as well as a maintenance contract.

"The team at Harland Simon are very knowledgeable and professional I was extremely impressed by the design work, attention to detail and the standard of the installation.

Even when we had internal issues with connecting the UPS to the hospital supply Harland Simon were patient and worked with us until the issue had been resolved.

Harland Simon are always there to assist in any power related problems that we may encounter." Roger Crick, Head of ICT Support Services, NHS Barnsley Hospital.
