

Harland ProtectUPS® - Industrial Protected Uninterruptible Power

The Harland ProtectUPS® - I is a range of rugged power protection solutions for industrial applications situated in harsh conditions where extreme temperatures and moist/wet conditions prevail.

Various modifications to meet customer's requirements are carried out in our ISO 9001:2008 approved Milton Keynes factory.

- **Extra alarms or monitoring**
- **High ingress protection**
- **One off special build products**
- **Solutions to fit space constraints**
- **Thermal protection**
- **Finished to customer specified colours**
- **Stainless Steel for saline conditions**
- **Floor standing and wall mounted options**

Harland ProtectUPS® - Industrial

The Range

The range of Harland ProtectUPS® - I solutions has been designed to meet the demanding harsh industrial environments from a wet and humid pumping station to a UPS installed within a wind turbine subject to shock and vibration.

Harland ProtectUPS® - I range is specifically designed and built to last.

We specialise in the following industrial markets:

- manufacturing plants/factories
- power and gas utilities sites
- water utilities sites
- renewable energy - tidal/wind/bio.
