

## Power Solutions for Security

Power Protection for Risk, Resilience and Security

Potential risk from terrorism to our national infrastructure demands tighter and safer security measures to protect gas and electric installations, water and sewage plants, transport routes and public places.

Harland Simon UPS Ltd is ensuring power continuity in both Critical National Infrastructure (CNI) and Security and Emergency Measures Directions (SEMD) programmes.

HSUPS is also playing a part in the combat against the modern day pirates of the high seas, especially in the Indian Ocean.
